Review of the Managing Director & CEO

The Bangladesh banking industry during the first half of 2014 was, by and large, stagnant. The economy was not flowing in a current, so to speak. The investment scenario was not that unfriendly though: the political landscape was not chaotic, there were no serious bottlenecks impeding infrastructure growth, no dearth of lendable funds in banks, and above all there was more than USD 20 billion FX reserve in the country. Still, the lower than expected credit demand from private sectors of the economy is suggestive of the fact that the pre-election uncertainty looms large on the investment sentiments. The external trade (import-export), on the other hand, has been in the growth mood, albeit slower than expected. Remittances, compared to last year, have seen a negative growth.

The banking industry, inflicted with dwindling profitability, deteriorating asset quality and lack of good governance in certain banks, is gasping for air. The challenges staring at the banking industry now are threefold: lower credit demand, deteriorating asset quality and shrinking profitability.

Eastern Bank, as a values driven institution and focusing on sustainability principles, fared well in terms of operation and business performance during the first half of the year. We have made an Operating Profit of BDT 2,986 million (2% higher than that of H1, 2013) in spite of stagnancy in credit growth and 12% decrease in deposits. Profit After Tax (PAT) of the Bank decreased by 4% to BDT 960 million during this period as the provision against loans and other assets increased by 34% mainly because of capital market exposure. Lower credit demand from real business sectors made the banks go for 'play safe policy' and investment in government securities that yield lower return than credit. Therefore, the negative growth of Net Interest Income (NII) of EBL (18% over that of H1, 2013) was more than compensated by a positive growth of investment income (69%) which eventually resulted in a 8% growth of Operating Income. The EPS of the Bank decreased marginally to BDT 1.57 (BDT

1.55 for the Group) during H1, 2014 compared to BDT 1.63 (BDT 1.60 for the Group) of H1, 2013.

Continued lackluster performance of certain economic sectors we are exposed to and stagnancy in credit growth during this H1 pushed our NPL ratio to 4.94% as on June 30, 2014 (3.59% at year-end 2013). We are aware of it and putting our best efforts to bring the NPL ratio down at an acceptable level by the end of the year. Our Capital Adequacy Ratio has remained consistently above the threshold level of Minimum Capital Requirement (10% of RWA) and stood at 12.27% (Solo Basis) as on March End 2014. Upon getting regulatory approvals, we are in the process of raising BDT 2,500 million by issuing Subordinated Debt which will further strengthen our capital base and shock absorption capacity. The Credit Rating of the Bank has been reaffirmed by CRISL to AA in the long term and ST-2 in the short term based on year-end audited financials 2013 and relevant qualitative factors.

Adaptability is the cornerstone of our growth strategy. This has become a buzz word for our everyday parlance. The world is fast changing; the ability to change and adapt to new conditions occurring in the marketplace is the key to surviving in this challenging environment. Our continuous effort to upgrade ourselves technologically, innovate products and services is embedded in our performance culture.

Our recent awards—IFC Global award and The Asian Banker Best Retail Bank award for two consecutive years—tell us that we are on the right track. For us at EBL, winning today is building for tomorrow.
